

Social and Economic Determinants of Birth Rates in 2023: A Cross-Country Linear Regression Analysis

“LifePulse: The Heartbeat of Global Fertility”

JOSH GANHINHIN | JOMAR LIGAS | LEX LEANDER LUMANTAS | MARK ORAÑO | PHILIP ANDREE TUPAS

ABSTRACT

IN 2023, CROSS-COUNTRY BIRTH RATE DIFFERENCES ARE MAINLY EXPLAINED BY DEMOGRAPHIC FACTORS, WHILE ECONOMIC INDICATORS SHOW NO INDEPENDENT EFFECT. THIS SUGGESTS FERTILITY POLICIES SHOULD FOCUS ON LONG-TERM DEMOGRAPHIC STRATEGIES.

RESEARCH PROBLEM

“WHAT DRIVES THE RISE AND FALL OF BIRTH RATES IN 2023?”
BIRTH RATES VARY WIDELY DUE TO THE INTERACTION OF KEY SOCIAL FACTORS AND ECONOMIC CONDITIONS, SHAPING POLICIES ON POPULATION GROWTH, HEALTH (SDG 3), ECONOMIC STABILITY (SDG 8), AND INEQUALITY REDUCTION (SDG 10).

DATASET AND REGRESSION APPROACH

YEAR: 2023
SAMPLE: 65 COUNTRIES
SOURCE: OUR WORLD IN DATA (OWID)
(AGGREGATES WORLD BANK, IMF, PENN TABLE)

SOCIAL / DEMOGRAPHIC FACTORS

- AVERAGE AGE OF MOTHERS
- AGE DEPENDENCY RATIO
- CHILD MORTALITY RATE
- CRUDE DEATH RATE

ECONOMIC / FISCAL FACTORS

- AVERAGE AGE OF MOTHERS
- AGE DEPENDENCY RATIO
- CHILD MORTALITY RATE
- CRUDE DEATH RATE

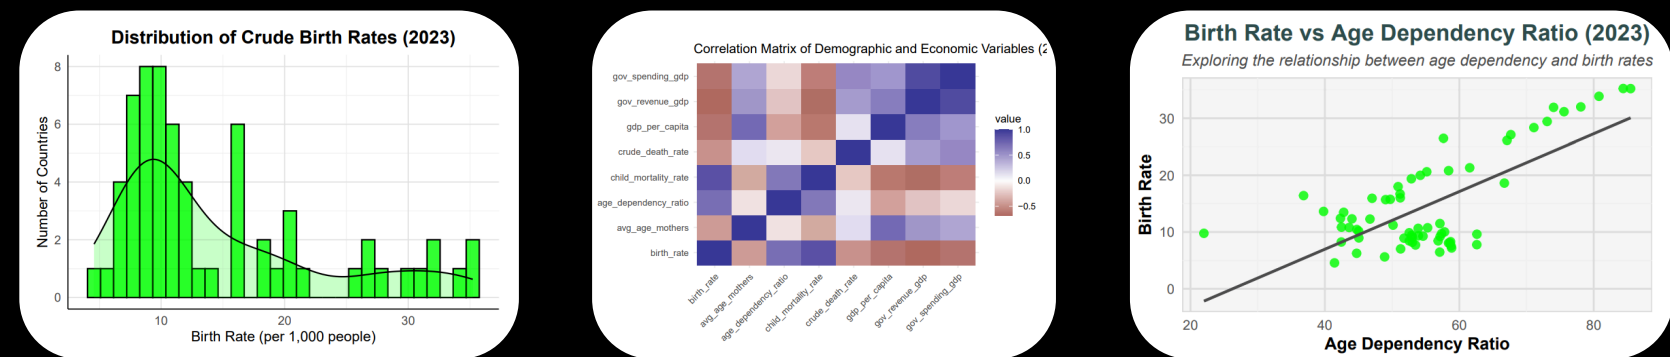

ROBUSTNESS

- AVERAGE AGE OF MOTHERS
- AGE DEPENDENCY RATIO
- CHILD MORTALITY RATE
- CRUDE DEATH RATE

CRUDE BIRTH RATE (CBR) – BIRTHS PER 1,000 POPULATION

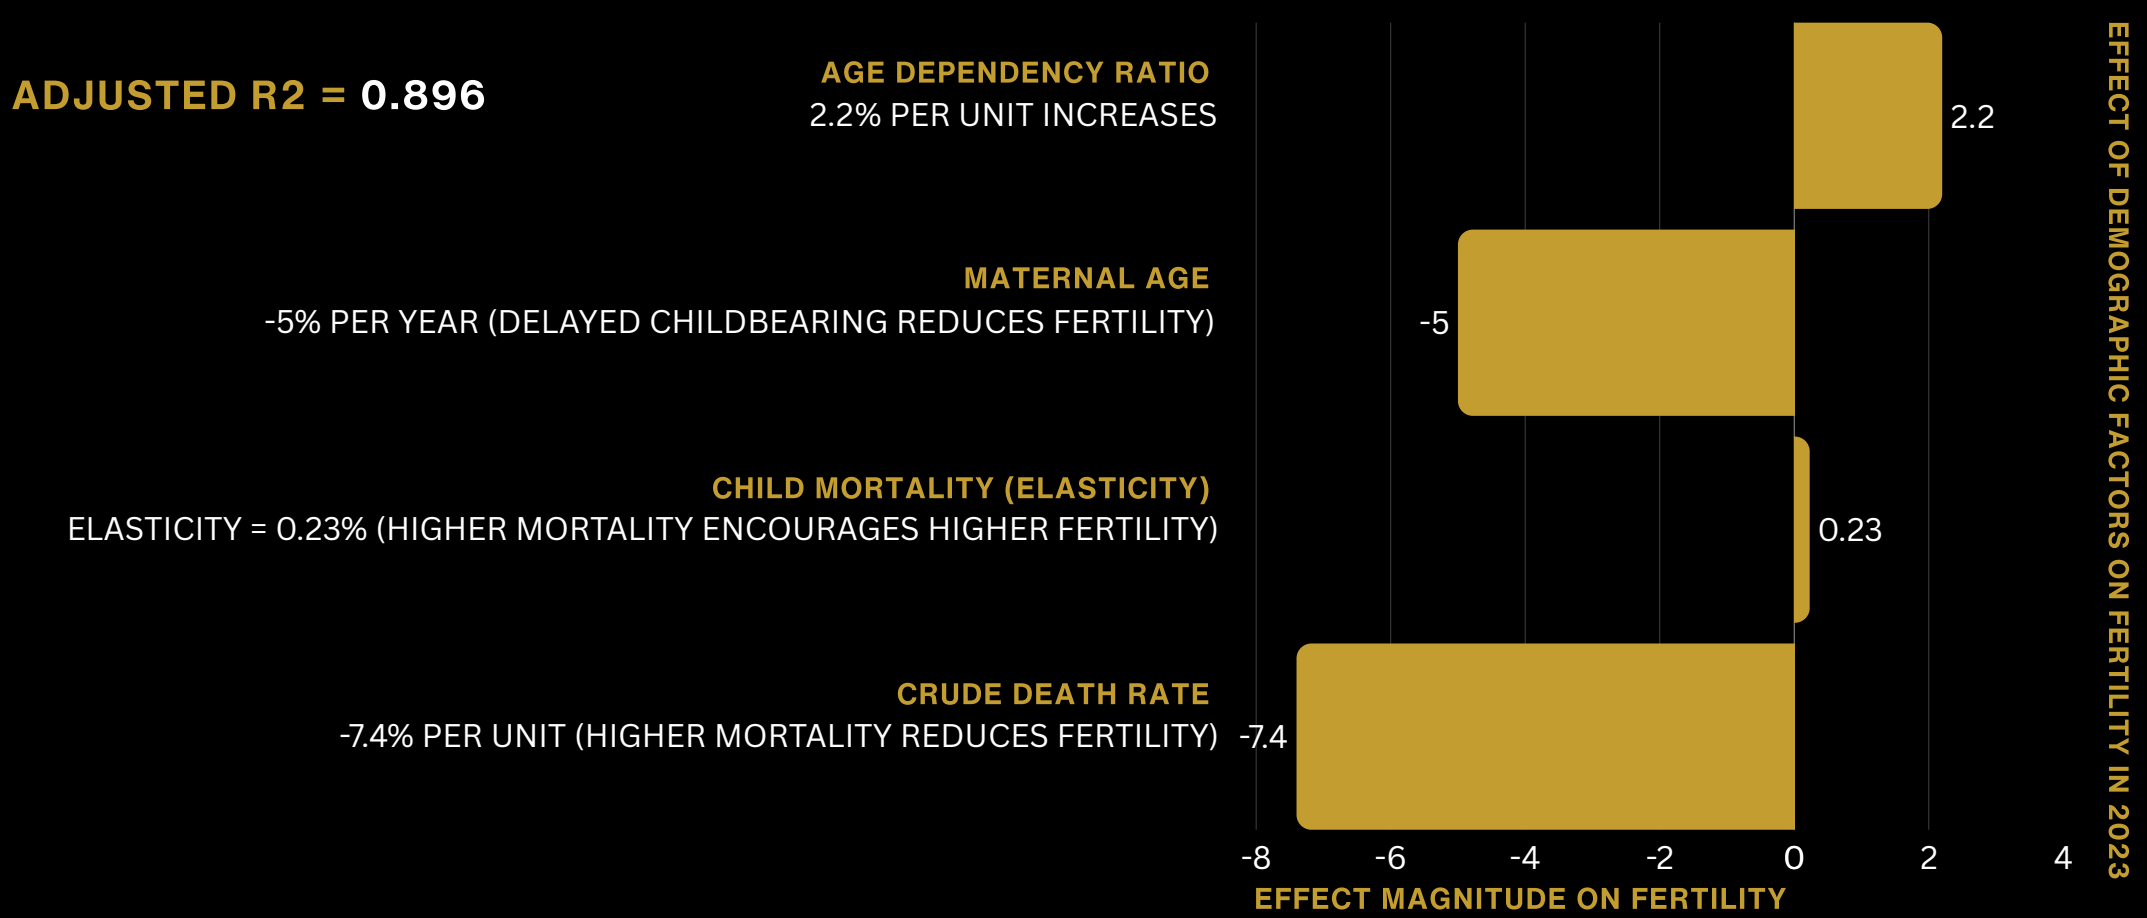

ECONOMETRIC MODEL: LOG-LINEAR OLS REGRESSION

LINEAR REGRESSION MODELS

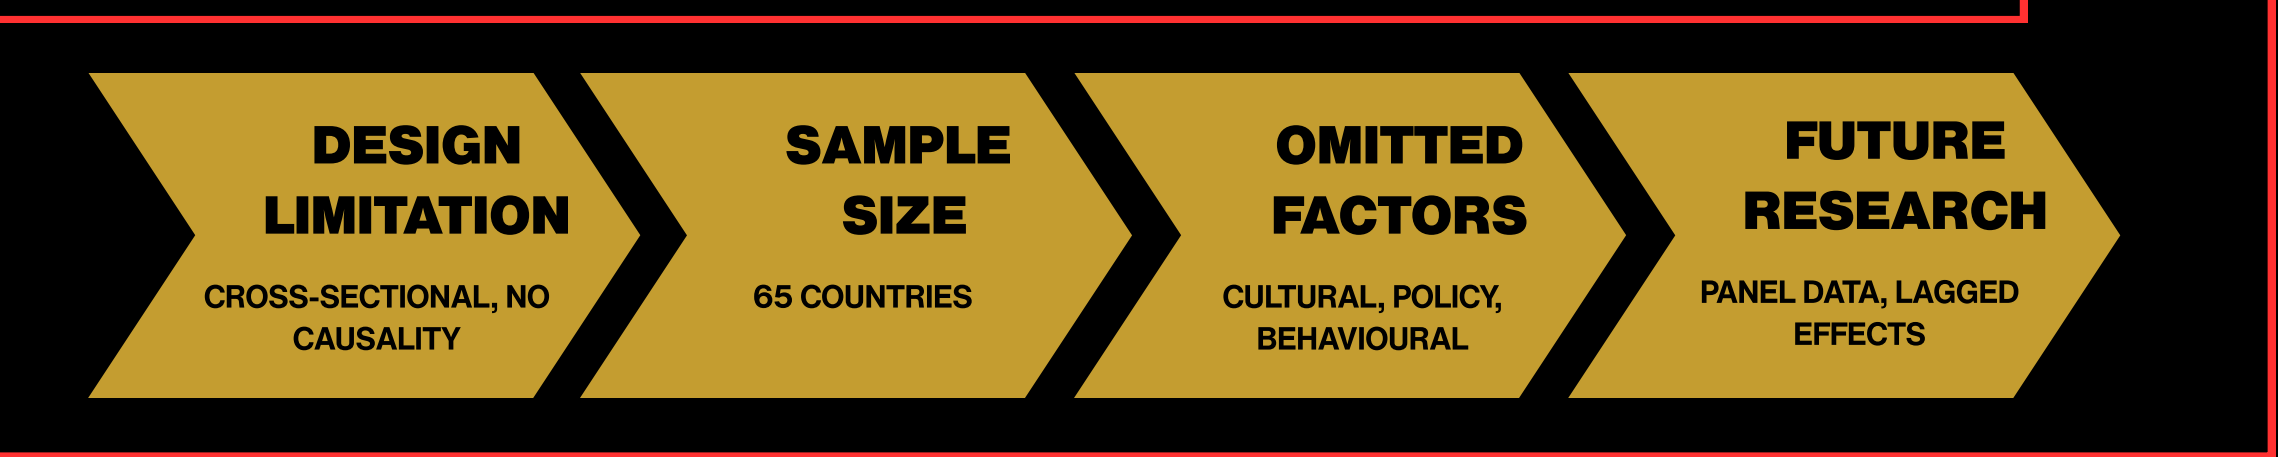

KEY FINDINGS

FERTILITY DIFFERENCES IN 2023 ARE MAINLY DRIVEN BY DEMOGRAPHIC STRUCTURE AND MORTALITY, WITH ECONOMIC FACTORS SHOWING LITTLE EFFECT, AND THE MODEL EXPLAINING ABOUT 90% OF FERTILITY VARIATION.

LIMITATIONS AND FUTURE DIRECTIONS

IMPLICATIONS

FERTILITY POLICY SHOULD PRIORITISE DEMOGRAPHIC AND HEALTH STRUCTURES, AS SHORT-TERM FISCAL MEASURES ALONE HAVE LIMITED IMPACT ON FERTILITY.
